WHAT IT TAKES TO BE A SAFETY SUPERSTAR

A football player wouldn't walk onto a playing field for a game without having trained. Nor would they run onto the field not wearing proper (and properly fitted) gear. Every player wants to be on the winning team but what's the #1 thing on every players mind?

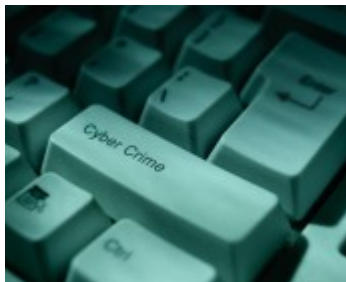

Safety.

It's on our minds every day! We're proud to offer 700+ ready-to-deliver online courses, many of which concern safety. Plus we're constantly adding more...read on and [take a look!](#)

Safety Super Star Resources

STEPS TO CREATE A SAFETY PROGRAM

TRAINING: FirstNet offers a number of courses to help develop a culture of safety in your workplace, from [Behavior-Based Safety Training](#) to [Employee Safety Awareness](#) to [Forming Effective Safety Committees](#) to [Job Safety Analysis](#) to [Supervisor Safety Awareness Program](#) - and more.

INFORMATION: You probably know the [National Safety Council](#) is a wealth of information, as is the U.S. Department of Labor Occupational Safety & Health Administration ([OSHA](#)) and the Center for Disease Control ([CDC](#)). Most states' Department of Labor have helpful guidelines and program outlines, such as the [Washington State Department of Labor & Industries](#). The North Carolina Department of Labor published a great [Guide to Office Safety and Health](#) and has information applicable to businesses of all sizes.

CHECKLISTS: Safety checklists exist for all types of businesses, from [office guidelines](#) to [public swimming pools](#) (checklists for [parents](#), too), to [warehouses](#) to [zoos](#)!

SHARING: When you were in high school did your local law enforcement ever bring a totally wrecked car for you to see (usually right before homecoming and/or prom) and tell you the story of what happened to it's occupants? Did you ever see the movie "[Scared Straight](#)"? Sharing of stories and experiences is a great tool to have in your safety program for driving home safety points. Don't have any of your own? Just [google](#) 'safety stories' and you'll find millions.

WHY STRESS SAFETY?

Employee safety should be on the minds of every employer, no matter the industry or type of business. It's in the best interest of everyone. Accidents may occur with high frequency (Slips, Trips & Falls) or low frequency (trench collapse). The greater the knowledge we have about dangers and how to avoid them, the better for everyone: employers, employees, and their loved ones. Because everyone's #1 goal should be to arrive home safely.

Training Tips...

TRY TO REMEMBER

Leave it to [WikiHow](#) to help us remember everything from something we've forgotten, to names, to tasks and dates, and things we've learned. Learn about chunking information, the use of mnemonic devices, and study tips. Following these tips can help learners of all ages improve our memories.

[Learn more about FirstNet](#), our training centers/learning management systems that can manage all of your blended learning, and our course catalog with hundreds of courses (in health & safety, employment liability, law enforcement, cyber security, human capital, driver safety, campus compliance and safety, keeping children safe, computer skills, & more) that can run on our or your LMS.
